

# Navy Expeditionary Intelligence Command

Navy Expeditionary Intelligence Command (NEIC) provides tactical indications and warning intelligence and force protection enabling Navy and Joint Commanders to conduct missions across the full spectrum of expeditionary operations.

With multi-intelligence, surveillance and reconnaissance (ISR) collection capabilities operating at the tactical level, NEIC has unique access to areas and environments - from

blue to green water, the coastal littoral, and far inland - that are constrained by more traditional ISR assets.

NEIC capabilities give expeditionary, maritime, joint and combined forces timely, relevant and actionable intelligence to deny the enemy sanctuary, freedom of movement, and use of waterborne lines of communication while enabling friendly forces to find, fix and destroy the enemy within the operation environment.

## Navy Expeditionary Intelligence is:

- Tactically focused and operationally relevant with strategic impact
- Tailored to meet operational commanders' needs
- Designed to maintain relevant technical collection skills and equipment with Joint and Combined forces
- Able to augment missions through adaptive and mobile intelligence collections
- Able to provide direct and general support to Maritime and Joint Force Commanders
- Comprised of Active and Reserve Components

*"Transforming information into a weapon requires deep penetration, awareness and understanding of the operating environment, of military, commercial, and social networks, of the mind of competitors and adversaries and of the 'customer' - a commander decision maker, operator, analyst, or even a weapon."*

The U.S. Navy's Vision for Information Dominance, May 2010

Timely, Relevant, Actionable

# NEIC at a Glance

## Full-Spectrum Operations Capable

NEIC is an agile, responsive expeditionary force capable of conducting tactical Intelligence Surveillance Recon (ISR), with forces ready to support full-spectrum operations anywhere at anytime.

## Capability Employment

NEIC provides a highly trained and fully-deployable cadre of Sailors that help commanders gain greater insight into operational domains, build partnerships, increase intelligence capabilities, enhance maritime security operations and drive operational success in all phases of military operations.

## Comprehensive Support

NEIC is responsible for providing operationally relevant intelligence capability. This includes the organization and training of personnel, logistics, movement and planning, and the required DoD intelligence certification for all capabilities. NEIC activities can be categorized as command, communications, administration, operations and support.

## NEIC Functional Areas and Capabilities

### Tactical Ground Human Intelligence (HUMINT)

Provide ground HUMINT military source operations in the green water and in-land environments through:

- Interviews, elicitation, tactical questioning
- Debriefings, liaison, document and media exploitation, and tactical site exploitation
- Open source exploitation

### Tactical Maritime HUMINT and Intelligence Exploitation

Support Visit, Board, Search and Seizure (VBSS) with:

- Tactical questioning and elicitation
- Maritime tactical site exploitation, document/media exploitation
- Maritime domain awareness

### Expeditionary Intelligence Analysis

Deliver tactical all-source analytic support with forward deployed expeditionary forces through:

- Joint intelligence preparation of the operating environment (JIPOE)
- Planning, directing, evaluation, and processing of collected tactical intelligence
- Theater familiarity, cultural awareness

### Tactical Electronic Warfare/Information Operations

Conduct tailored support for tactical maritime and ground irregular warfare missions through:

- Real-time tactical force protection
- Indications and warnings
- Computer network operations support
